

## What is EZOps PAYLOAD?

EZOps PAYLOAD is an easy-to-use cloudbased solution to digitize ticketing and hauling logistics.

By connecting the field to the office in real-time, clients using PAYLOAD gain greater visibility into their logistics business cycle.

**EZLogix has decreased our overall transport costs by 25% by reducing our trucking company pool to only include those with optimal performance, renegotiated rates with all, and increased our on-time deliveries to avoid costly shutdowns.**

## Managed Logistics Services

# EZLogix Managed Logistics Services

With years of oil and gas logistics and HSE experience, our team of professionals provide operators with a cost-effective solution to optimize their logistics to their operations, increase transparency of loads, and ensure accountability through the process.

Our logistics services cover a wide range of operations – from ad-hoc freight to production hauls to Drilling and Completions services.

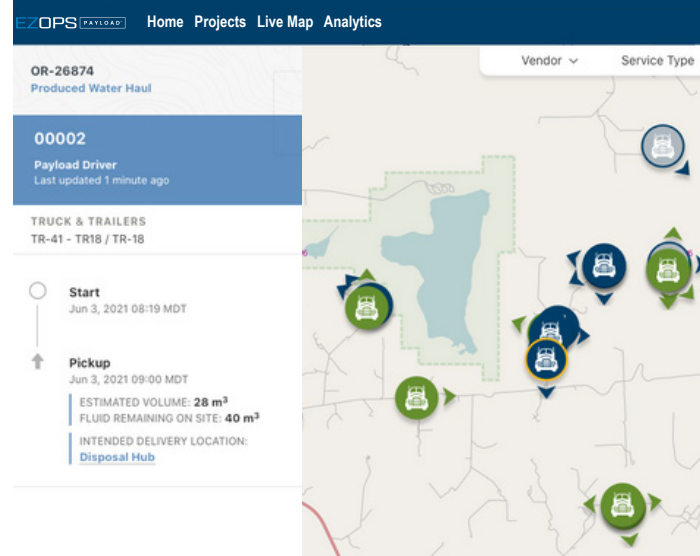

EZOps PAYLOAD, our digital ticketing solution, serves as the backbone of our service eliminating lack of visibility, negotiating carrier rates, managing carrier safety, and ensuring compliance documentation is always in place.

## Ensuring Efficient Operations with On-Time Deliveries

EZLogix manages a team of logistics professionals with over 50 years of logistics experience in oil and gas.

EZLogix ensures your loads are delivered on time so your operations run smoothly. Starting with carrier enrollment, your carrier experiences the EZLogix difference with training and HSE compliance. Carriers then use the Payload mobile application to accept loads, assign drivers, digitally manage documentation, and then generate an invoice – all from the palm of their hands.

- Ensures that the carrier has the capacity for the type of job
- Precisely coordinates with the PAYLOAD App the fastest routes and ensures compliance documentation is up to date
- Identifies carriers ensuring everything is in order related to the HSE with the drivers
- Establishes contracts and negotiates the best rate for you
- Helps you with communication

## EZLOGIX

### What value does EZLogix deliver to customers?

- Predict issues to maximize production and revenue and minimize downtime
