

Too many applications.  
Too much paper.  
Not enough visibility.

- Paper logs and scattered spreadsheets
- Disconnected applications
- Delayed updates between field and office
- Missed tasks, duplicated work, avoidable site visits

EZOps addresses these common operational challenges. Our goal is to make work easy for your field crews so they can be more efficient and focused on the work that matters most.

Are you ready to start your EZOps FREE Trial?

Schedule a demo to see how EZOps produces more profitable wells, reduces OPEX, and delivers full visibility from the palm of your hand. Like what you see? Start your FREE trial.

Mobile Oilfield Platform

# Make Work EZ with one platform.

EZOps connects field and office in real time and puts all field activity in the palm of your hand – even when you're offline.

- Single point of entry for field activity and data collection
- Offline access for remote locations
- Automated reporting and analytics
- API integrations with data flowing in and out
- Easy export and improved data quality
- Faster onboarding for new field techs

Operations Efficiency

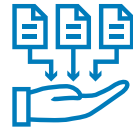

Auditable Compliance and Risk Reduction

Improved Data Quality & Easy Data Integration

**EZOps**  
Mobile Oilfield Platform

## Built for the people who keep the oilfield running.

### Operations Managers

Visibility across locations, faster issue resolution, automated reporting

### Logistics Teams

Better coordination, fewer last-minute dispatches, smarter hauling workflows

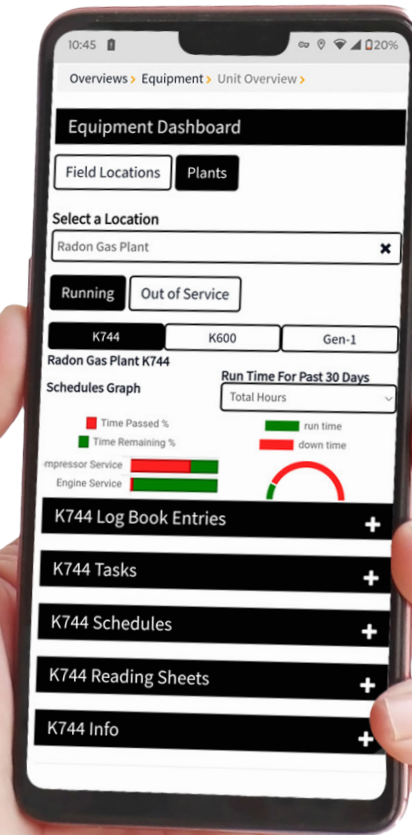

### Safety Managers

Simpler HSE reporting, faster escalation, audit-ready documentation

### Field Crews

Less paperwork, clear priorities, no missed tasks

## How we empower the people who power the oilfield.

### Real-Time Field Data in One Platform

Replace fragmented systems and paper with one mobile platform for scheduling, task management, maintenance, inspections, tank level monitoring, compliance, and communication.

**30%**

increase in productivity

**18%**

reduction in OPEX

### Workflow Automation That Scales

Automate workflows such as preventative maintenance and failed inspections, prioritize high-impact work, reduce downtime, and keep teams aligned.

**30%**

decrease in trucking costs

**25%**

reduction in unplanned maintenance

### Built-In Compliance and Risk Controls

Streamline tracking, inspections, MOCs, and reporting with time-stamped records and clear accountability.

**100%**

compliance and visibility
