

LOOKING TO OPTIMIZE YOUR CHEMICAL SPEND?

EZOPS

FIELDLINK™

EZOps Fieldlink for Chemical Management helps you manage your chemical program data and provides data insights leading to cost optimization and efficiencies in your chemical programs.

By gathering data from your chemical vendors and putting it in a consistent format, you can:

**Validate production
chemical program efficiency**

**Track and manage field
sampling and lab data**

**Ensure batch treatment
program compliance**

**Validate the effectiveness of
treatment plans**

**Collect continuous injection
inventory and delivery data**

**Make treatment plan
adjustments as necessary**

**Measure continuous injection
rates against targets**

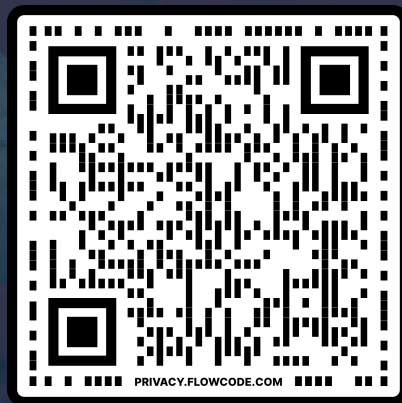

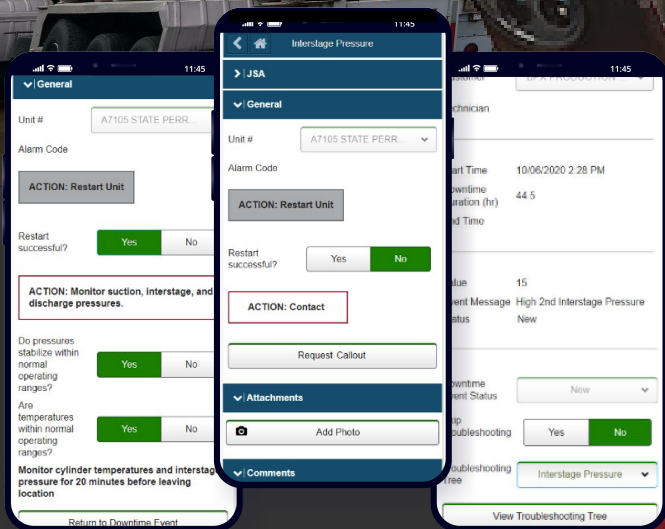

**Automate reporting to flag
actionable insights for
improvement**
