

LOOKING TO REDUCE DOWNTIME AND INCREASE COMPRESSOR FLEET OUTPUT?

EZOPS

FIELDLINK™

EZOps Fieldlink for Compression Management gives your fleet maximum performance with increased runtime and usage.

Key functions include:

- Capturing unplanned maintenance events
- Scheduling preventive and major maintenance
- Tracking gauge readings
- Flagging failure and downtime events on compressor units
- Driving proper JSA usage and safety event reporting
- Tracking parts consumption and time entries against work orders

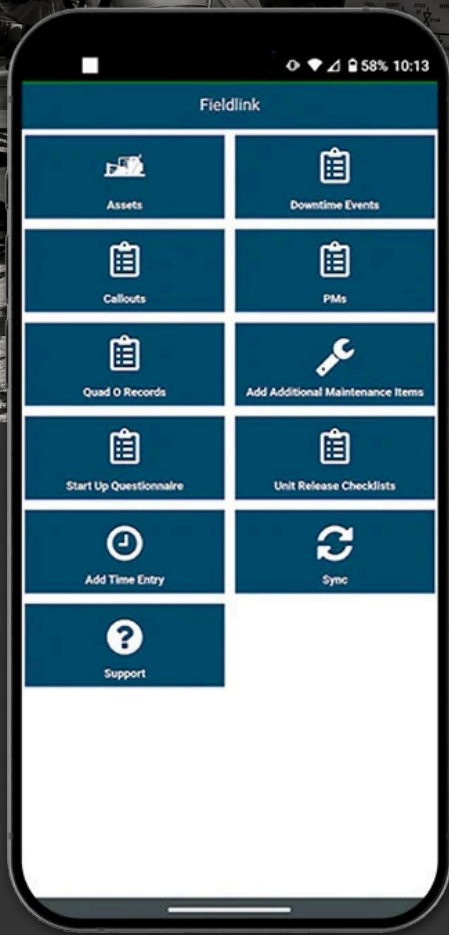

Streamline back-office tasks by connecting EZOps Fieldlink to ERP and HR systems to better predict parts inventory, ensure accurate billing, and automatically export hours directly to payroll platforms.
