

Compression Field Service Management:

Where better management tools mean better field results.

Legacy systems, paper-based forms, and scattered communication tools prevent optimal management of your compressors in the oilfield putting uptime at risk.

EZ Ops Fieldlink provides a mobile, Compression Field Service Management module that equips your team with an all-in-one platform that connects field and office teams in real-time – streamlining service and maintenance management to maximize compressor performance and reducing costly downtime related to compressor failure.

Schedule, Dispatch & Track Work Orders Seamlessly:

Plan and assign jobs, track technician progress, and close out work orders digitally — reducing admin time and improving service response.

Mobile-First Field Access:

Technicians can view equipment details, capture service data, and submit photos or reports right from their mobile device — online or offline.

Real-Time Visibility Across Teams:

Field and office stay aligned with live updates, configurable dashboards, and instant reporting — driving smarter, faster decisions.

Parts & Inventory Management:

Ensure the right parts are on hand, reduce inventory waste, and improve first-time fix rates.

Capture Emissions & Compliance Data Easily:

Track environmental & regulatory data to support compliance and sustainability goals.

Boost Uptime & Performance:

Use actionable analytics to prevent unplanned shutdowns, optimize asset use, and improve maintenance planning.

15%

More Productive Field Teams

Better planning and tools free up time for your technicians to focus on what matters — keeping compressors running.

25%

Faster Work Order Closeouts

Digital workflows cut paperwork and delays, closing the loop between dispatch and resolution.

30%

Fewer Unplanned Shutdowns

With live data and proactive maintenance, teams can address issues before they escalate.

Ready to transform your Compression Field Service Management and increase your compressor uptime?

Schedule a demo with our team and see how EZ Ops Fieldlink can streamline your field service, improve uptime, and boost profitability.
