# Management of Change (MOC) Solution
Because operational change demands clarity and control.

The impact of poor Management of Change can be catastrophic in the oilfield. It not only has a financial impact, but can also lead to safety incidents, downtime or NPT, and environmental issues. In such a complex, ever changing environment, clarity and visibility are mandatory.

EZOps mobile-first MOC solution simplifies and digitizes your entire MOC process - from submission to approval to closure - ensuring each step is properly actioned to quickly move to the next step in the process.

Submit MOC & RIK requests anytime, anywhere—online or offline:
Field teams launch standardized forms directly from the app, attach documentation, and submit with just a few taps—ensuring fast, accurate entries at the point of need.

Custom workflows, risk matrices, and built-in accountability:
Support for 4x4, 5x4, and 5x5 risk matrices. Assign reviewers by department, attach contextual instructions, and enforce review and approval workflows specific to your company's compliance model.

Real-time visibility and status tracking for field and office:
Operators, coordinators, and approvers can monitor requests, see required changes, and confirm when actions are complete—providing traceability every step of the way.

Integrated compliance and audit-ready records:
All requests, reviews, approvals, comments, and documents are digitally tracked and time-stamped, providing a defensible record that's easy to retrieve and report.

80%
Less time spent coordinating MOC requests and approvals

50%
Faster action taken on MOC repairs and process updates

100%
Visibility into MOC request status and actions completed
