

Maintenance Management Solution: Because Prevention is Cheaper than Unplanned Downtime

Managing Maintenance = More Profitable Wells: Unplanned equipment failures are not only costly but can lead to catastrophic HSE incidents. In today's oilfield operations, maintenance management is key to reducing OPEX, reducing unplanned downtime, and increasing profitability of wells.

EZ Ops enables field teams to proactively manage maintenance through a unified, mobile platform without searching through emails, WhatsApp or spreadsheets. Easily schedule preventative maintenance and tasks to ensure equipment is addressed before an unplanned outage. Reporting and analysis are made easy with data in a single repository. Management visibility is created to easily assign tasks and keep your field ops running smoothly.

Digitize and Automate Recurring Maintenance Schedules:

Operators and contractors receive task alerts to ensure items are completed on time.

Analysis and Reporting to Address Recurring Items:

Reporting and analysis are made easy with all data in a single repository. Address root cause of recurring items to further reduce OPEX.

Instant Visibility Across Locations and Assets:

Monitor upcoming, overdue, and completed schedules across your entire fleet with real-time dashboards and exportable reports.

Drive Accountability and Documentation:

Assign tasks to specific operators or third-party vendors, complete with estimated durations, required parts, and instructions. Attach photos or PDFs to document completed work and corrective actions.

Offline-First Task Management from the Field:

Schedules and corrective tasks can be completed online or offline—ensuring data capture even in remote regions.

43%

Reduction in Emergency Repairs

Teams see fewer unplanned shutdowns through consistent adherence to maintenance schedules.

31%

Faster Completion of Scheduled Work

Streamlined workflows and task clarity improve execution speed and reduce time on site.

90%

Task Closure Compliance

With built-in acknowledgments and automated reminders, nothing falls through the cracks.

Get Started Today.

Stop being reactive by becoming proactive.

Schedule a demo with our team to see how proactive maintenance on EZOps produces more profitable wells, reduces OPEX, and ensures compliance – all from the palm of your hands with our mobile-first solution.
