

Production Management:

Where Efficiency Meets Profitability. Unlock the Potential of Your Production.

Paper logs, siloed systems, and manual tracking are costing you more than time – they’re holding back your production and decreasing your well profitability. This manual, disjointed systems create operational inefficiencies, unplanned downtime, and increased OpEx to reduce profitability.

EZ Ops enables production teams to eliminate paper processes and fragmented systems with its mobile platform that consolidates all operational functions in the palm of your hand. Teams are able to streamline a digital workflow to increase efficiency and data accuracy. By consolidating all production data, tasks, and alarms into a single, easy-to-use platform, operators and supervisors have complete visibility and control over what matters most.

Production Data Tracking:

Seamlessly capture and manage production metrics, whether through SCADA integrations or manual field entry. Set parameters so data out of range immediately alarms to reduce production issues.

Pump Rate Management:

Monitor, adjust, and optimize pump rates to ensure efficient fluid handling and reduce risk of over- or under-injection.

Tank Level Management:

Track chemical and production tank levels, predict refills, and prevent costly runouts or overflows.

Pigging Management:

Keep pigging schedules on track with automated reminders, documentation, & compliance reporting.

Integrated Reporting & Analytics:

Real-time dashboards and customizable reports for production teams and leadership.

Back Office Integration:

EZ Ops serves as the entry point for data in the field. It can hold data on its own while also easily integrating with back office systems.

41%

Reduction in Production Issues

Through monitoring and prioritization, operators can quickly identify and address anomalies before they escalate.

48%

Faster Response Times to Alarms

Automated alerts and field-office communication ensure that issues are resolved 2x faster than traditional systems.

30%

Increase in Productivity

Optimized task scheduling including pigging helps field teams maximize productivity and focus on activities that deliver the greatest impact.

Ready to Maximize Production?

Let's transform your production management into a competitive advantage.
