

Creating More Profitable Wells, One Task at a Time.

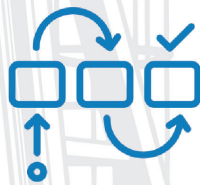

Introducing **EZ Ops**, your single, mobile oilfield management platform, to help optimize your operations. Have you ever wondered if it would be possible to get rid of paper processes in the oilfield? Or if it would be possible to have all of your foundational oilfield processes on a single, mobile platform? And by doing this you could increase productivity by 30% and reduce Opex by 18% - in oilfield terms that's millions of dollars in savings and increased efficiency! Drill faster, frac faster, produce more.....FASTER! We've made this possible using EZ Ops.

Field operations teams have the responsibility of managing a multitude of tasks in drilling, completions, and production operations while keeping everyone safe - all to produce more, faster, and cheaper. With so many moving parts, it's a constant churn to determine how best to optimize the day while keeping critical tasks a priority.

How Do We Do That?

**PRODUCTIVITY
OPTIMIZATION**

**AUTOMATION &
EFFICIENCIES**

**CREATING
TRANSPARENCY**
